Tuning in a new Fob to phone unit – DG1

1. Turn both units off
2. While holding down the 'operate' button, switch the gate on with the internal toggle switch.
3. Keep the 'operate' button pressed for 1-2 seconds then release
4. Red LED above battery flashes slowly
5. Press the button on the transmitter box at the phone unit.
6. Red LED in gate unit just above battery flashes quickly
7. Press the button on the transmitter box at the phone unit a second time.
8. Red LED in gate unit just above battery flashes slowly
9. Press the 'operate' button on the barrier cabinet to complete the tuning process.
10. Repeat with other unit (don't forget to turn first unit off when doing second unit)
